

# Simplified IT deployments start here:

## Power distribution:

Easily integrated metered, low-profile rack PDUs attach quickly in the back, saving valuable U space for IT equipment.

## Cable management:

The system is engineered for keeping cables neat and organized, with a range of accessories to support vertical, horizontal, front, and rear cable routing.

## Airflow management:

Enclosure design and additional accessories help maintain proper equipment airflow, improving efficiency and availability for servers and networking switches.

Introducing the single answer to today's IT deployment challenges:  
The NetShelter SV rack with intelligent rack PDU.

## Quick IT architecture

The APC™ by Schneider Electric NetShelter™ SV enclosure is the simple foundational architecture you need to make sure your IT can keep up with your business. Whether you're deploying an initial batch of servers and switches or adding to your existing environment, you can count on our quick-to-install and adaptable IT physical infrastructure to accommodate your unique requirements at any given time.

## Versatile enough for any deployment

Our portfolio of accessories can help to optimize server installations, as well as a range of typical networking applications. They are available in a variety of sizes, and one is even available unassembled. Our single system leaves physical infrastructure to us so you can focus on your business.

## Business-wise, Future-driven.™

## Intelligent, low-profile rack PDU

### > Metering

- Monitoring of rack- and outlet-level energy consumption (varies by model)
- Capacity planning and warning of potential circuit overloads

### > Remote individual outlet control

- Ability to reboot equipment remotely, control outlet access, and sequence IT equipment startups

### > Environmental monitoring

- Integrated temperature/humidity monitoring

by Schneider Electric

APC by Schneider Electric products, solutions, and services are an integral part of the Schneider Electric IT portfolio.
